# 🧠 Gemini CLI Skills Index

This document serves as a centralized reference for all globally available Gemini CLI skills installed in ~/.gemini/skills/ (linked to the Desktop vault).

---

## 🛠️ System & Meta-Skills

*The core engine room for session initialization and skill development.*

- **daily-cli-init**
  - **Description**: System initialization for the Gemini CLI to ensure a consistent environment and persona alignment.
  - **Usage**: Triggered at the start of a session to load the Senior ID Persona and verify vault connectivity.
- **defuddle**
  - **Description**: Web-scraping and content-extraction tool using the Defuddle CLI to convert complex webpages into clean, readable Markdown.
  - **Usage**: Activate to extract relevant core content from URLs, minimizing token consumption and maximizing information density.
- **write-postmortem**
  - **Description**: Retrospective analysis tool for systematically evaluating the success, failures, and lessons learned from a completed project.
  - **Usage**: Activate at the conclusion of a project phase to capture institutional knowledge and synthesize it into the vault.
- **skill-creator**
  - **Description**: Meta-skill for designing, documenting, and implementing new Gemini CLI skills.
  - **Usage**: Use to extend CLI capabilities. It guides you through creating SKILL.md and supporting scripts.

---

## 📚 Knowledge Management & Documentation

*Tools for maintaining the "LLM to Wiki" architecture and vault integrity.*

- **ingest**
  - **Description**: Ingests new raw source documents into the knowledge base, updating the wiki, index, and log.
  - **Usage**: Activate when adding new articles, papers, or transcripts to extracts key info and update entity pages.
- **query**
  - **Description**: Queries the knowledge base and synthesizes answers from existing wiki pages.
  - **Usage**: Use to ask questions against your synthesized wiki; searches index.md and relevant pages.
- **lint**
  - **Description**: Performs a health-check on the wiki to find orphan pages, contradictions, and stale claims.
  - **Usage**: Run periodically to maintain structural integrity and consistency across the vault.
- **obsidian-cli**
  - **Description**: Bridge between the command line and the Obsidian vault for bulk operations and batch maintenance.
  - **Usage**: Activate for large-scale vault refactoring, link resolution, and automated frontmatter management.
- **work-notes-formatter**
  - **Description**: Ingests, formats, and reorders work notes/emails into structured chronological timelines.
  - **Usage**: Use when processing email histories to ensure summary-led entries and original record preservation.
- **obsidian-markdown**
  - **Description**: Specialized skill for Obsidian Flavored Markdown (wikilinks, callouts, properties).
  - **Usage**: Ensures notes leverage Obsidian's feature set while maintaining high information density.
- **obsidian-bases**

    - **Description**: Manages the core structural templates and "base" notes for the Lead ID framework.
    - **Usage**: Ensures new course folders or project hubs follow standardized vault architecture.
- obsidian-daily-journal
    - **Description**: Automates the creation and maintenance of the 01_Daily log entries.
    - **Usage**: Trigger to log tasks, reflections, and context for the next session.
- add-daily-pointer
    - **Description**: Generates and adds new "Daily Pointers" to the Vibe Coding Daily Log.
    - **Usage**: Generates a strategic learning guide based on current vault context.

---

## 🎨 Design, UI & Accessibility

*Professional development tools for high-fidelity, compliant web interfaces.*

- web-design-engineer
    - **Description**: Enhances AI-generated web pages by injecting design taste, anti-cliché rules, and a structured design system workflow.
    - **Usage**: Use for any visual, interactive, or front-end deliverable to ensure non-generic, high-quality aesthetics.
- baseline-ui
    - **Description**: Enforces UI standards for Tailwind CSS projects, including typography and accessibility.
    - **Usage**: Apply constraints to the current conversation or audit specific files for violations.
- ui-skills
    - **Description**: Parent skill coordinating accessibility, metadata, and motion performance audits.
    - **Usage**: Acts as an orchestrator for comprehensive UI refinements.
- ui-ux-pro-max

    - **Description**: Advanced design workflow combining cognitive load theory with automated execution.
    - **Usage**: Use for high-stakes projects requiring production-grade web interfaces.
- frontend-design
    - **Description**: High-fidelity development skill using React, Tailwind, and modern UI primitives.
    - **Usage**: Build production-grade UI components following Baseline UI standards.
- fixing-accessibility
    - **Description**: Specialized audit and remediation skill for WCAG 2.1 and ADA compliance.
    - **Usage**: Identifies contrast issues, ARIA gaps, and keyboard navigation issues in HTML/React.
- fixing-motion-performance
    - **Description**: Audits and optimizes animations for 60 FPS and reduced-motion preferences.
    - **Usage**: Optimizes durations and checks for layout thrashing in CSS/JS snippets.
- fixing-metadata
    - **Description**: Optimizes SEO, Open Graph, and JSON-LD structured data for learning objects.
    - **Usage**: Generate or fix meta tags and social previews for digital assets.
- web-artifacts-builder
    - **Description**: Suite for building multi-component React artifacts (TypeScript, shadcn/ui).
    - **Usage**: Use for complex interactive tools requiring state management and bundling.

---

## 📊 Visualization & Presentation

*Transforming logic and data into visual assets.*

- excalidraw-diagram

    - **Description**: Generates and edits Excalidraw-compatible JSON for architectural diagrams.
    - **Usage**: Describe a system/process to receive JSON for direct pasting into Excalidraw.
- mermaid-visualizer
    - **Description**: Generates Mermaid.js syntax for flowcharts, sequence, and class diagrams.
    - **Usage**: Describe logic flows to receive Mermaid code for Obsidian or web use.
- json-canvas
    - **Description**: Specialized tool for creating and manipulating .canvas files (JSON standard).
    - **Usage**: Programmatically generate node-and-edge maps for knowledge graphs.
- obsidian-canvas-creator
    - **Description**: Transforms text content into structured Obsidian Canvas files.
    - **Usage**: Provide an outline/article to generate a valid .canvas JSON file with spatial positioning.
- pptx
    - **Description**: Comprehensive skill for reading, editing, and creating PowerPoint (.pptx) files.
    - **Usage**: Mention a "deck" or "presentation" to extract text or generate new slides.
- nanobanana-ppt-skills
    - **Description**: Integration with NanoBanana for automated slide generation and visual storytelling.
    - **Usage**: Transform scripts or outlines into structured presentations with visual placeholders.

---

## 🎓 Instructional Design & AI Alignment

*Pedagogical tools for course building and AI resilience.*

- ai-stress-test

    - **Description**: Conducts an "AI-able Audit" for course assignments to evaluate vulnerability.
    - **Usage**: Use /stress-test [text] to simulate AI completion and receive redesign strategies.
- **canvas-course-builder**
    - **Description**: Workflow for building accessible course environments within Canvas LMS.
    - **Usage**: Focuses on ADA compliance, responsive layout, and OIT-standardized snippets.
- **humanizer**
    - **Description**: Refines AI-generated text to sound natural and aligned with the Senior ID Persona.
    - **Usage**: Humanize course announcements or assignments for specific pedagogical tones.
- **humanizer-zh**
    - **Description**: Chinese-language humanizer optimized for natural Mandarin pedagogical expression.
    - **Usage**: Same as humanizer, but tuned for Chinese linguistic nuances.
